PROJECTS

NextHaul Moving Platform (In Progress)

- Full-stack moving services platform with real-time communication and cloud-based backend.
- Built with Flutter and AWS, featuring role-based access control and serverless architecture.
- Implemented AWS Cognito authentication with secure user groups (Admin, Mover, Customer) for role-based access and session management.
- Designed and deployed scalable backend using AWS Lambda, API Gateway, and DynamoDB for booking lifecycle management and operations.
- Built real-time WebSocket chat system using AWS API Gateway WebSockets enabling live messaging between clients, movers, and administrators.
- Engineered DynamoDB schema for bookings, messages, and connection tracking with optimized query patterns using global secondary indexes.
- Implemented server-side authorization logic enforcing booking ownership, role permissions, and chat access rules at the backend level.

Pet Sitter Website

- Built full-stack booking platform using HTML, CSS, JavaScript
- Integrated SQL for backend data storage and structured booking management
- Implemented Firebase Realtime Database for live booking updates and synchronization

Focus N Flow Study App

- Mobile productivity app for managing study sessions and tasks.
- Built with Flutter and Firebase, featuring authentication and cloud-based data storage.
- Implemented Firebase Authentication and real-time cloud synchronization for persistent task management across sessions.

Cloud Computing & AWS (In Progress)

- Learning AWS core services including EC2, S3, and IAM.
- Studying cloud architecture fundamentals, scalable system design, and deployment of backend applications in cloud environments.
- Building foundational knowledge of distributed systems and cloud infrastructure.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL, Dart, C++

Tools & Technologies: Flutter, Firebase, Git, GitHub, REST APIs, HTML, CSS

Cloud & DevOps: AWS(Lambda, API Gateway, Cognito, DynamoDB, S3, EC2), Linux CLI, Docker (basic)

EDUCATION

- Bachelor of Science in Computer Science,
Georgia State University - 2025
